Vaccination The Foul Invention of Hell

Vaccination is the most gigantic piece of quackery ever exploited among a civilized people, in this or any other age of the world's history.

Dr. Walter R. Hadween,
Gloucester, England.

Vaccination, in the Hawaiian Islands, has not only failed in its purpose, but has resulted in the rapid and extensive spread of syphilis, leprosy, and other diseases.

Dr. Bringham,
Museum Natural History,
at Honolulu.

CONSUMPTION follows vaccination.

Dr. Alexander Wilder.

Does vaccination afford any protection?

"In my opinion none at all."
Charles Creighton, M. D., A. M.
The world's greatest
authority on vaccination.

Vaccination helps to spread smallpox.

Dr. Kiehl, of Haag, Germany.

I have recently dissected more than a dozen children, whose deaths were caused by vaccination; and no smallpox, however black, could have left more hideous traces of its malignant sores, foul sloughing, hearts empty or congested with clots, than did some of these little victims. Shame!

William Hycheeman, M. D., in the
"New York Medical Tribune,"
1880.

While utterly powerless for good, vaccination is a certain cause of disease and death in many cases, and is the probable cause of about ten thousand deaths annually, by five inoculable diseases of the most terrible and disgusting character.

Professor Alfred Russell Wallace, of Eng.
The distinguished Scientist.
Quotation taken from Third Report of the British Royal Commission on Vaccination. Minutes of evidence 7713, page 34.

Vaccination is a crime. Not that it kills everybody vaccinated, but because it kills some of them, and maims others. I could show you a woman, the right half of whose face was destroyed, as a direct result of blood-poisoning from vaccination. The sight of this unquestionable disfigurement should shame every vaccinator in the Land.

Dr. Zachary F. Willer,
Pittsburg, Pennsylvania.

Continue, gentlemen, to vaccinate if you choose, BECAUSE YOU MAKE MONEY BY IT. But never forget, pseudo-physicians and false scientists that you are, that while you sow vaccination among the people, they will reap disease and death.

Dr. Hubert Boens,
Charleroi, Belgium.

Hell itself, explored from the deep (lower than the lowest) has no teaching, no practice, so degrading, unmanly and ungodly, as that comprised in the theory and observance of vaccination. Vaccination, properly interpreted, means blood poisoning. Blood poisoning comprehends death.

John Pickering, F. R. G. S.,
F. S. S., etc.

I feel no hesitancy in stating that vaccination is the certain cause of diseases in vogue, has been the cause of more suffering and of more deaths than smallpox has during the same period, and, I am willing to state, many time more.

Dr. C. W. Larisou,
Rings, New Jersey.

Every day vaccination laws remain in force children are being poisoned, diseased, crippled, tortured, maimed and killed, by this barbarous and cruel practice, inherited from our ignorant and superstitious forbears of a pre-scientific age.

Dr. J. W. Hodge,
Niagara Falls, New York.

There is no way of determining, by the microscope or any kind of test of any character whatever, between lymph which contains the virus of syphilis and lymph that does not.

L. M. Crookshank, M. B., M. R. C. S.
Professor of Pathology and
Bacteriology, King's College,
London.

The mere fact that vaccine has killed numerous innocent children and adults on

account of uncontrollable contamination with the deadly germs of diphtheria, glanders, tetanus and tuberculosis, alone justifies the abolition of such empiric, barbarous oriental procedure.

Charles G. Kuhlmann, M. D.
San Francisco.

Consumption has widely spread since the introduction of vaccination.

"The Medical Times & Gazette,"
of January 1854.

Does re-vaccination afford any protection?

"Personally I contracted smallpox less than six months after a severe re-vaccination."

Dr. Robert Hall Bakewell,
Former Vaccinator General,
Island of Trinidad.

I have seen healthy children die rotten from vaccination.

Dr. Dennis Turnbull.

After collecting the particulars of 400,000 cases of smallpox, I am compelled to admit that my belief in vaccination is absolutely destroyed.

Dr. A. Vogt,
Professor of Hygiene, Berne
University, Switzerland.

I oppose vaccination, because forty years of practice has convinced me vaccination does not afford the least protection or mitigation from smallpox.

Alexander M. Ross, M. D., F. R. S.

In June, 1888, I was on duty in Strassburg, and over two thousand cases of smallpox were in the pesthouse, EVERY ONE SUCCESSFULLY VACCINATED BUT THREE MONTHS BEFORE, AND FOR THE THIRD TIME. I myself was laid up for five weeks, although I had been vaccinated for the seventh time successfully.

Dr. J. A. Hensel, a German
Army Surgeon.

I believe that scrofula, syphilis, eczema, and consumption are liable to be contracted by vaccination. My conclusions are based on both actual personal experience, and careful study.

Charles G. S. Austin, M. D.
U. S. Examining Surgeon,
Nantucket, Mass.

An absolute fast from the beginning of the disease (smallpox), and a glass of lemonade every three hours, with a hot bath daily, will absorb the eruption to such an extent that almost all the vesicles will dry up without a formation of pus. I will agree to put my treatment to a public test, and if I do not prove that there is absolutely nothing in vaccination, and the accepted treatment of smallpox, and that marking is positively due to the lack of knowledge and skill in the management of the disease, I will agree to give the failure as wide a circulation as I do this challenge.

Dr. J. H. Tilden,
Denver, Colorado.

Persons are in many cases severely marked who have been successfully vaccinated.

Dr. J. A. Erskine Stuart, L. R. C. S.

Vaccination is of no use whatever as a preventative to smallpox. It is always dangerous, and liable to cause other diseases.

A. B. Campbell, M. D.
435 Putnam Avenue,
Brooklyn, New York.

I consider vaccination to be one of the greatest humbugs ever foisted on human beings.

Dr. John Stewart, Perth.

Vaccination is a grotesque superstition.

Dr. Charles Creighton, M. D.
Aberdeen.

Vaccine Lymphs are intended to produce disease.

Dr. L. C. Appel.

Origin of the Foot and Mouth Disease Among Cattle

The Bureau of Animal Industry, in the Agricultural Department, after careful investigation, declared that the outbreak of foot and mouth disease (in November 1908) started from CALVES used in the PROPAGATION of SMALLPOX VACCINE VIRUS, which had been contaminated with the virus of foot and mouth disease brought in from abroad.

THE FACTS

A Pennsylvania chemical firm imported some smallpox vaccine virus, which was contaminated with foot and mouth disease. It KILLED the CALVES which were INOCULATED, but it SOLD some of the VIRUS to a DETROIT DRUG HOUSE. CALVES used by the latter firm for the propagation of the SMALLPOX VIRUS were NOT KILLED, but were sent to the Detroit STOCK-YARDS for SLAUGHTERING.

Three separate tests were made by the Government scientists to establish the truth of their theory as to the origin of the disease. Young cattle and sheep were inoculated with VACCINE VIRUS obtained from both firms. Foot and mouth disease was produced in experimental animals by the use of vaccine of the same strain obtained from both sources; while other strains of VACCINE gave negative results. The investigation also indicated that the outbreak of foot and mouth disease in New England, in 1902, was probably due to contaminated VACCINE of Japanese origin.

In the present case (foot and mouth disease among cattle) the federal authorities are tracing with the greatest care several hundred shipments of supposedly infected VIRUS and SERUM for hog cholera.

From a recent editorial in the "Chicago Evening Post."
The Editor states: "Our facts in this editorial are taken from the Journal of the American Medical Association," of May 22, 1909, where an interesting digest of the Government's findings is presented."

COMMENT: Think of it! SMALLPOX VACCINE VIRUS contaminated with foot and mouth disease—so contaminated that it even killed the calves which were inoculated with it!

Just think of inoculating dear, sweet little children with dirty, filthy, rotten COWPOX VIRUS, which is infected with foot and mouth disease, and is so deadly that it even killed the calves inoculated with it!

Some of this virus was sold to a Detroit Drug House. Calves used by this Drug House for the propagation of the SMALLPOX VIRUS were not killed, but WERE SENT TO THE DETROIT STOCK-YARDS FOR SLAUGHTERING.

After reading the above, can any sane person doubt that vaccination had its origin in the very lowest part of hell?

Vaccine Virus Made from the Rotten Tissue of a Sick Calf

A calf is strapped to an operating table so it is perfectly helpless. The belly and udder shaved, and from 100-120 incisions made with a lancet and into these wounds IS RUBBED THE FILTHY PUS TAKEN FROM A RUNNING SORE ON A SMALL-POX PATIENT.

The calf is then unstrapped and tied up with his head to the wall so that it shall not lick itself for eight days.

Some of you know what you have suffered from a single pustule on your arm. You know the terrible irritation and suffering. Fancy having 100-120 on your stomach, with no opportunity of assuaging the torment.

At the end of eight days this poor dumb creature, after passing through fever and smallpox, is brought back and once more strapped to the table in order to get the dirty, decomposed matter out. The pustules have to be SQUEEZED WITH IRON CLAMPS. Often the tops are cut off, and the matter from the scabs scooped out.

From the above photograph you can see how it is done.

SPECIAL NOTE: Just think of this dirty, filthy, rotten cowpox virus, after having passed through a syphilitic smallpox patient and through the rotten sores on a heifer's stomach, being put into the bodies of children, young ladies, men and women!

Read the following:

The Lancaster Co., Vaccine Farm,
Marietta, Pennsylvania.
October 25, 1906.

Dear Dr. Hodge:

In response to your inquiry of the 25th inst., we beg to state that vaccine virus, or its active principle, is a subject about which very little is definitely known. We are only able to write of the results obtained from certain conditions.

It was thought by Dr. H. M. Alexander, the founder of our establishment, that he had discovered a case of spontaneous cowpox, and we have been using, as one of our strain of seed virus, this source for nearly twenty years.

IT LATER DEVELOPED, HOWEVER, THAT THE CASE REFERRED TO EVIDENTLY WAS INOCULATED BY A TRAMP HAVING SMALLPOX AND WHO SLEPT IN THE STABLE.

We regret our inability to give you more definite information on the subject, but trust the above may be of some value to you.

(Signed) Dr. H. M. Alexander & Co., Inc.
By R. C. Engle, Manager

Quoted from "The Peril," of Battle Creek Michigan, November 1, 1914.

A petition is to be filed with the Governor and the State Board of Health, asking that the First State Bank Building of Zion City be placed under strict quarantine, in order to protect the citizens from the Poisonous Gases escaping daily from the "Bellows" within.

Outside factories in Zion City—are just as proper and beneficial as hogs in a parlor.

Whenever any doctor says that Vaccination prevents Smallpox, he is an infernal liar—and he knows it.

Murdered by Vaccination

Ellicottville, September 23rd.

The funeral of Andrew Fediek, was held from St. John's Episcopal Church yesterday afternoon, the Rev. J. H. Parsons officiating. Burial was in Sunset Hill Cemetery. The deceased was the thirteen year old son of Jacob Fediek. He was vaccinated about two weeks ago. About the middle of last week he became seriously ill, and rapidly grew worse. He died Saturday afternoon. His death has aroused a strong anti-vaccination sentiment in the community where the Fedieks reside.

Dunkirk, October 13th.

Fred Stinefoot, nine years old, son of Mr. and Mrs. William H. Stinefoot, of No. 220 Mullet Street, died suddenly of tetanus, at the Brooks Memorial Hospital this afternoon. The boy was vaccinated a little over three weeks ago. Last Monday he was taken with convulsions.

New York, November 20th.

Richard C. W. Waters, of Brooklyn, is prepared to bring suit for damages against the City, charging that his son, age eight, died of tetanus following compulsory vaccination. He suffered agony for a week before his death.

SPECIAL NOTE: Hundreds are murdered by vaccination every year, but only a small number of the cases are made public; for the murderous doctors resort to every trick known, and tell innumerable lies in order to cover up the results of vaccination, which, if fully known to the public, would create one of the greatest stirs in the history of the world.

All Zion men should have their clothes made in Zion Tailor Shop. Join at once the "Made in Zion City" movement! Thousands of dollars now sent out of Zion City, could just as well be kept in Zion City and paid out in wages to faithful Zion people. Let all Zion men in Benton Township join in this movement, to wear clothes made in Zion City. Zion must rapidly get to the place where nothing shall be bought from outside that can be made by Zion people in Zion City.
